DETAILED ACTION

1. This action is responsive to communications: application filed on 7/6/2004.
2. Claims 1, 3-5, 7, 8, 10-12 and 14-20 are pending in the case. Claims 1, 8, 15, and 16 are independent claims.

Allowable Subject Matter

3. Claims 1, 3-5, 7, 8, 10-12 and 14-20 allowed.
4. The following is an examiner's statement of reasons for allowance: Applicant's claimed invention, as now amended, utilizes a browser frame set with frame spoofing inhibited, thus denying the passing of control of a frame from a first session to a second session and vice versa. The inhibited frame spoofing security feature was not standard on the Internet Explorer browser until 12/23/1998 or on Netscape Communicator browser until 3/9/1999. These browsers with inhibited frame spoofing were not available at the time Kanavy et al. (hereinafter "Kanavy") and Hills et al. (hereinafter "Hills") were created and thus was not a limitation upon how they are meant to operate. Although Lloyd, Hills, and Kanavy each teach certain individual aspects, the invention as claimed is novel and not obvious in light of the motivation to generate a web presentation in a hybrid environment where the browser frame set is inhibited from spoofing. The Examiner's further search has not yielded any additional prior art related to generating a web presentation in a hybrid environment wherein the browser frame set is spoofing inhibited.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
